Weather conditions:.....

Skills	Pass Y/N	Comments e.g: almost there or lots more practice needed
1. Rig Access 303 correctly, and supervise launch		
2. Reef both sails while moored to the pontoon Then configure rig for the wind conditions.		
3. Sail out through the moorings and safely across Ferry Lane by shortest route at maximum speed		
4. Sail a triangular course as set by the tester around the YA marks demonstrating ability to tack and gybe.		
5 Treat the tester as a new sailor, and explain what's happening to the sails etc. Get them involved.		
6.Demonstrate how to attract the safety boat		
7. Arrange for the safety boat to come and throw you a line. Demonstrate how you would attach it to the dinghy for towing. Be towed for 100 metres, steering. Disengage towline.		
*8. Remove joystick and sail a course with the keel box handle only		
9. Approach pontoon, stop head to wind, and make a perfect landing.		
*10. With dinghy moored to pontoon, raise the keel, and insert the keel pin		
TOTAL NUMBER OF Y s		Signed tester:

\* These skills not strictly required for sailors with disabilities  
Y in all these boxes: deemed competent, and can train and test others.  
7 – 9 : can be skippers, but need to retake the test to be competent.  
5 and under: cannot take people with disabilities sailing. Practice with  
competent skipper and retake the test.
